User Profile:

- Name:** Miguel Andres Diaz Lache
- Level:** Level 3 (x10)
- Rating:** 23
- Subscription:** NO SUBSCRIPTION

Recent lessons:

- You've leveled up!** (Sintaxis de Java, Level 3, Lesson 0) - 5 stars. Description: The third motivational lesson prepared by CodeGym's super training specialist is about which plan is right and which is not, how competition affects success, and which professionals enjoy 80% of income. And you'll also learn about the widespread failures that await graduates. **AVAILABLE**
- Game of Codes: a song of bytes and wire** (Sintaxis de Java, Level 2, Lesson 11) - 5 stars. Description: After working religiously to master Java fundamentals, you can relax a bit and watch a movie about Java! Today's New! Break features something far more intense than the Game of Thrones... it's the Game of Codes. Bootstrap yourself for an epic soft-war between Java and the Googlers for the sake of APIs. :) And don't nod at Dave! **AVAILABLE**
- Useful links from the Professor - 2** (Sintaxis de Java, Level 2, Lesson 10) - 5 stars. Description: As usual, at the end of the level the professor gives you additional literature to study. You don't need to read everything at once. Gradually progress (not at the expense of completing the tasks!) is very desirable. Perhaps after your reading, some topic previously shrouded in mystery will become understandable and instinctive. **AVAILABLE**

You can continue to complete tasks:
